Proven track record of improving system performance, reducing errors and delivering measurable business impact through technical solutions. Experienced collaborating with cross-functional teams to translate business requirements into scalable, maintainable code.

## EXPERIENCE

**Senior Fullstack Developer**                                                               **Sep 2025 - Feb 2026**
*FastForward.IA*                                                                                            *US - Remote*

•Hanes: Designed and built a comprehensive BI dashboard that aggregated thousands of store and order records , tracking total revenue, order volumes, and order status for decision making.

•Abbott: Slashed Amazon SES bounce rate by 50% by developing an email validation system combining custom regex patterns with SMTP verification, improving account reputation and customer tracking accuracy.

•Abbott: Automated coupon redemption for LATAM markets using Messagebird to support 1,000+ daily users . Typescript, NodeJs, NestJS, Next.js, React, Redis, AWS, Tailwind CSS, RabbitMQ.

**Senior Fullstack Developer**                                                               **May 2023 - June 2025**
*SSB International*                                                                                          *AR - Remote*

• Developed client-facing customs brokerage platform as part of 3-person development team, building new features and refactoring existing code to track international freight shipments, customs clearance, and local tax compliance for users in Argentina and Brazil

• Built custom session-based access control system from scratch to secure sensitive business data, implementing role and group-based filtering that dynamically scopes dashboard queries.

• Developed custom reporting modules enabling users to build, save, and export dynamic reports from order, shipment, customs declaration, and ISO tank data, implementing backend query logic and role-based column visibility for different user types.. Laravel, JS, MySQL, GIT, AWS.

**Semi Senior Fullstack Developer**                                                         **June 2022 - Nov 2022**
*Anteojos Negros*                                                                                           *AR - Remote*

• Developed an e-commerce platform for a ceramic and granite seller

• Designed the payment view and integrated a local e-wallet API, making transaction times 30% faster. Laravel, JS, MySQL, GIT.

**Semi Senior Fullstack Developer**                                                         **Jan 2022 - June 2022**
*Contenidos Interactivos*                                                                                  *AR - Remote*

• Built a human resources web app, for employee management and tracking

• Wrote unit tests and feature tests.

• Implemented the Google Geolocation API and webcam verification for employee check-in and check-out. Laravel, VueJs, MySQL, GIT.

**Junior Fullstack Developer**                                                               **Sep 2021 - Jan 2022**
*SQL SYSTEMS*                                                                                               *AR - Remote*

• Developed and maintained websites for private schools and learning institutions.

• Fixed a legacy billing system to avoid unnecessary PDF generation, reducing the

server load and cutting manual work. CodeIgniter, JS, MySQL, HTML/CSS.

**Junior Fullstack Developer**                                                               **Nov 2019 - Sep 2021**
*Eduger*                                                                                                    *AR - Remote*

• Developed and maintained websites for insurance companies.

• Integrated an API to issue policies faster. PHP, JS, MySQL, HTML/CSS.

## EDUCATION

**Universidad Tecnológica Nacional**                                                                     **03/2022**
*Software Engineering*                                                                                     *Buenos Aires*

## SKILLS

**Technical Skills:** PHP (Laravel), JavaScript (Node, React, Next, Nest), MySQL, MongoDB, C# (.NET), Go, Python. Backend, frontend, problem solving skills, REST, API, AI, LLM, CI/CD, Git, Amazon S3.
